DETAILED ACTION

Applicant's arguments, filed 7/18/2007, are fully considered but they are not deemed to be persuasive. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Applicants have amended their claims, filed 7/18/2007, before rejections newly made in the instant office action have been necessitated by amendment.

Claims 1-13 and 15-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventive group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/18/2006.

Claim 14 is the current claim hereby under examination.

Claim Rejections - 35 USC § 102

Response to arguments:

Applicant's arguments, filed 7/18/2007, with respect to the rejection of claim 14 under 35 USC 102 (e) has been fully considered and are persuasive because of applicant's amendment to the claim. Therefore the rejection has been withdrawn.

The following rejection has been necessitated by amendment and is newly applied:

Claim Rejections - 35 USC § 103

Art Unit: 1631

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sliwowski (US P/N 6,949,245).

The claims are directed to an intracellularly binding immunoglobulin molecule comprising: a variable heavy chain, which exhibits at least 85% homology to the consensus sequence SEQ ID No 3; and a variable light chain.

Sliwowski teaches the limitations of claim 14 at col. 10, lines 15-21, col. 64, lines 58-67, col. 65-66 and col. 69. Sliwowski at col. 10, defines an intact antibody as a molecule that is comprised of both heavy chain and light chain components. Sliwowski at col. 64 further discusses antibodies used for therapy in colorectal cancer and references an antibody that comprises seq id no 6, which is a sequence with 93.6% homology to the claimed heavy chain in claim 14 of the instant patent application. Therefore, the antibody used that comprises seq id no 6, which is a consensus heavy chain, will also comprise a light chain by the definition of an antibody, which reads on a variable heavy chain which exhibits at least 93.6% homology to the consensus sequence SEQ ID No 3; and a variable light chain.

Sliwowski does not explicitly teach a variable heavy chain which exhibits at least 94% homology to the consensus sequence SEQ ID No 3.

Art Unit: 1631

It would have been obvious to one of ordinary skill in the art at the time of the instant invention that a variable heavy chain, which exhibits at least 93.6% homology to a sequence would also exhibit 94% homology to the same sequence as the difference in homologies is a mere 0.04%, which is a difference that is an obvious variation. When there is motivation to solve a problem and there are a finite number of identified, predictable solutions, a person of ordinary skill has good reason to pursue the known options within his or her technical grasp. If this leads to anticipated success, it is likely the product not of innovation but of ordinary skill and common sense. In this instance the fact that a combination was obvious to try shows that it was obvious under § 103. It would have been obvious to try for one of ordinary skill in the art because it is common practice to try to achieve greater homology with respect to this type of invention.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1631

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
